

Stock visibility in sub-contracting plants

Organization Name: MARICO

Overview:

Currently, Marico outsources the blowing/filling processes in Manufacturing to the 3rd Party locations (Subcontracting Plants as per Marico SAP). We do not have visibility of the stocks in the Subcontracting Plants.

Business Challenge:

How can technology help in improving visibility of stocks in 3rd party locations?

A 3rd Party Location is a subcontracting plant which might be exclusive/non-exclusive for the company.
